

Blockchain Engineer

ABOUT

A seasoned Full Stack Developer with a demonstrated history in Blockchain technologies across various industries including DeFi, Blockchain Gaming, NFT marketplaces, and Wallet Building. Smart Contract Development skills extend across multiple blockchains: Ethereum, Algorand, Solana, and Postchain using programming languages like Solidity, Pyteal, Rust, and Rell.

EXPERIENCE

- Specialized in Protocol Development
- Experienced in AMM, Yield Farming, DID, NFT utilizing platforms such as Cosmos, Cosmwasm, and Substrate (including Ethermint, Band Protocol, Wasmd, IBC, CW+ , and cw-ibc).
- Proficient in smart contract development, blockchain architecture, and consensus mechanisms.
- Skilled in optimizing blockchain performance and ensuring security and scalability.

TECH STACK

- Go
- Rust
- Solidity
- Node
- Typescript
- Realm
- Ether.js
- MySQL
- MongoDB
- AWS

EMPLOYMENT HISTORY

Blockchain Developer, Side Protocol

October 2022 – Present

Developing ibc module to implement atomic/interchain swap (IBCSWAP), Side chain development(Ethermint/inflation module).

Blockchain Developer, ChromaWay

February 2021 – September 2022

Owned Chain Development, IBC packet Development with OH chain for OH marketplace.
Contributed to My Neighbor Alice Smart contract.

Blockchain Developer, lunch Network

September 2017 – December 2020

Oracle Offchain and Relay development, Zap/Aggregator Development for Uniswap,
Sushi.

Software Engineer, Xsure.io

August 2015 – April 2017

E-commerce Development, SAAS Service development for enterprise, midmarket and several
business.

EDUCATION

Master, University POLITEHNICA of Bucharest

Aug 2012 – Sep 2015

Distribution Computing System, IoT.
