

# BI Engineer

---

## ABOUT

A seasoned BI Engineer with 5 years of hands-on experience, adeptly translating data into strategic insights. Proficient in designing and maintaining data architectures, crafting efficient ETL processes, and creating interactive visualizations. Collaborates seamlessly with stakeholders to drive data-driven decisions and optimize business performance.

## EXPERIENCE

- Mastered designing and optimizing complex data pipelines, ensuring seamless extraction, transformation, and loading (ETL) processes.
- Proficient in creating interactive dashboards and visualizations that distill complex data into actionable insights.
- Strong collaboration skills, working closely with cross-functional teams to align BI strategies with business objectives.

## TECH STACK

- SQL

## EMPLOYMENT HISTORY

### **Business Intelligence Developer, Sii Poland**

September 2018 – Present

As a Business Intelligence Developer, I design, develop, and maintain data-driven solutions that empower informed decision-making. I create and optimize data models, design interactive dashboards, and implement ETL processes to transform raw data into actionable insights.

### **BI Engineer, Capgemini**

February 2017 – August 2018

In this role I was responsible for designing and developing robust business intelligence solutions that transform raw data into actionable insights. Leveraging my expertise in data modeling, ETL processes, and analytics tools, I enabled informed decision-making and drive operational efficiency.

### **Junior BI Engineer, Capgemini**

October 2015 – February 2017

As a Junior BI Engineer, I contributed to the development and maintenance of business intelligence solutions. My responsibilities included data extraction, transformation, and loading (ETL), as well as creating and maintaining reports and dashboards. I collaborated with senior team members to optimize data processes and supported data-driven decision-making within the organization.

### **Test Specialist, Sygnity S.A.**

July 2014 – September 2015

As a DWH/ETL Developer specializing in ETL using IBM InfoSphere DataStage, SQL, and PL/SQL languages, I was responsible for designing, developing, maintaining data integration processes within a Data Warehouse environment and transforming raw data into meaningful insights for decision-makers. I leveraged issue tracking through Jira and version control using SVN to ensure seamless collaboration and effective management of development projects.

### **ERP Implementation Specialist/Consultant, CODERIA Sp. z o.o.**

March 2014 – June 2014

As a Test Specialist, my role involved meticulous evaluation of software applications and systems to ensure their functionality, performance, and reliability. I designed and executed comprehensive testing plans, identified defects, and collaborated with cross-functional teams to drive quality improvements.

### **Junior SAP Basis Consultant, HICRON**

October 2013 – January 2014

As a Junior SAP Basis Consultant, I actively contributed to the management and maintenance of SAP systems, assisting in installations, upgrades, and performance tuning. Collaborating with senior consultants, I participated in troubleshooting technical issues and implementing system enhancements.

## **EDUCATION**

### **Bachelor's degree, Business management, Wrocław University of Economics and Business**

2009 – 2013

This program equipped me with essential skills in leadership, communication, strategic planning, and organizational management preparing me to excel in a wide range of

business roles, from supervisory positions to entry-level management, with a solid understanding of marketing, finance, human resources, and operations.
