

# Cloud Engineer

---

## ABOUT

Cloud Engineer with 5+ years of experience in the field. Proficient in designing, implementing, and managing cloud infrastructure, with proven track record of optimizing performance and ensuring seamless scalability.

## EXPERIENCE

- Implemented robust disaster recovery solutions, ensuring business continuity and minimizing downtime during critical incidents.
- Played a key role in designing and implementing an auto-scaling solution that dynamically adjusts resources based on demand.
- Collaborated with cross-functional teams to architect a secure and compliant cloud environment, meeting stringent industry standards.

## TECH STACK

- DevOps
- AWS

## EMPLOYMENT HISTORY

### Cloud Engineer, COAX Software

June 2018 – Present

Streamlined DevOps workflows by leveraging cloud-native tools and methodologies, accelerating software delivery and enabling continuous integration and deployment. Proactively monitored and optimized cloud infrastructure performance, anticipating scaling needs and ensuring optimal resource allocation for peak demands. Deployed microservices-based applications, enhancing scalability and flexibility in response to changing business requirements.

## EDUCATION

## **Master's Degree, Ivano-Frankivsk National Technical University of Oil and Gas**

Conducted independent research, and gained expertise under the guidance of experienced faculty. Master's program emphasized critical thinking, problem-solving, and leadership skills.
