

Senior BI Engineer

ABOUT

A Business Intelligence Engineer with 14 years of rich industry experience with strong proficiency in designing, developing, and optimizing data-driven solutions that empower organizations to make informed strategic decisions and with extensive background spans across various sectors, encompassing both technical expertise and a deep understanding of business processes.

EXPERIENCE

- Proven track record of implementing complex ETL (Extract, Transform, Load) processes.
- Led cross-functional teams, fostering collaboration between business analysts, data scientists, and other stakeholders to deliver BI solutions aligned with organizational goals.
- Excelled in creating compelling and intuitive visualizations that effectively communicate insights to both technical and non-technical stakeholders.

TECH STACK

- XML
- SQL

EMPLOYMENT HISTORY

Senior Business Intelligence Developer, BNY Mellon

May 2018 – Present

As a Senior Business Intelligence Developer, I led the design and implementation of complex data integration processes, developed advanced analytics solutions, and created intuitive visualizations for informed decision-making.

Business Intelligence Developer – Professional, Volvo Group

June 2011 – April 2018

As a Business Intelligence Developer, I designed and implemented robust ETL processes, ensuring seamless data integration from various sources. I created interactive and insightful data visualizations, enabling stakeholders to make informed decisions.

Business Intelligence Support Engineer – Professional, Volvo Group

July 2010 – May 2011

As a seasoned Business Intelligence Support Engineer, I adeptly provided technical expertise and troubleshooting assistance to ensure seamless operation and optimization of BI systems. I collaborated closely with cross-functional teams, diagnosed issues, and implemented solutions, ensuring data accuracy.

Business Intelligence Support Engineer – Junior, Volvo Group

October 2008 – June 2010

As a Junior Business Intelligence Support Engineer, I provided essential technical assistance by troubleshooting and resolving BI system issues. I actively collaborated with the team to enhance data quality, assisted in ETL processes.

Information Technology Intern, Volvo Group

June 2008 – September 2008

My responsibilities were supporting IT team in various tasks, including troubleshooting hardware and software issues, assisting in network maintenance, and contributing to system upgrades. I participated in documentation efforts, helped users with technical inquiries, and gained hands-on experience in IT operations and support.

PHP Developer – Junior, Planet Soft S.A

April 2008 – June 2008

As a Junior PHP Developer, I actively contributed to the development and maintenance of web applications. I assisted in coding, testing, and troubleshooting, while collaborating with the team to deliver functional and efficient solutions.

EDUCATION

Computer Science, Mathematics Aspects in Computer Science, Wrocław University of Economics and Business

A Computer Science program with a focus on Mathematics Aspects provided me with a strong foundation in both disciplines, emphasizing the symbiotic relationship between computer science and mathematics. This program explored the mathematical principles that underpin computer algorithms, cryptography, data analysis, and complex system design.
