

# iOS Developer (Swift)

---

## ABOUT

With six years of experience as an iOS developer, I have a proven track record of designing, developing, and maintaining high-quality mobile applications for the iOS platform. Proficient in Swift and Objective-C, I excel in crafting intuitive user interfaces, integrating APIs, and optimizing app performance. My expertise extends to collaborating with cross-functional teams, staying updated on the latest iOS advancements, and consistently delivering user-centric and visually appealing applications to the App Store.

## EXPERIENCE

- Demonstrated proficiency in building captivating mobile applications using SwiftUI and Swift programming language.
- Collaborated with cross-functional teams to deliver high-quality applications that meet user needs and industry standards.
- Specialized in crafting user-friendly interfaces, implementing features, and staying up-to-date with the latest trends and best practices in the dynamic field of iOS development.

## TECH STACK

- Swift
- Angular
- Flutter
- Dart
- JavaScript
- jQuery
- HTML
- CSS
- Bootstrap
- GruntJS
- bower.js
- Ember.js
- Express.js
- React
- Redux
- TypeScript
- React Native

## EMPLOYMENT HISTORY

### **iOS Developer, ODDITY**

April 2023 – Present

In my current role as an iOS Developer, I specialize in leveraging SwiftUI, iOS, and Xcode to create captivating mobile applications. I actively contribute to the end-to-end development process, utilizing my proficiency in Swift programming to design and implement intuitive user interfaces and seamless user experiences.

### **Senior Mobile Application Developer, opinov8**

March 2022 – March 2023

My responsibilities included: delivering features, leading React Native project, working with Scrum/Kanban, working with DevOps on Android and iOS pipelines, communicating with clients, estimating cross-platform React Native and Native iOS projects, setting up CI/CD along with devops team.

### **iOS Developer, Noisy Miner**

August 2021 – March 2022

As an iOS Developer, my role involved creating and enhancing mobile applications for the iOS platform. I was responsible for designing, coding, testing, and debugging applications.

### **iOS Developer, opinov8**

August 2020 – August 2021

Maintained the existing project, developed new features, connected to third party API. Integration with third party services. Worked on Fintech application that helps employees receive their salary before the payment day.

### **Senior React / React Native / JS Developer, Noisy Miner**

July 2018 – August 2021

I've participated in launching 3 products from scratch. Also in 1 product I was involved as an additional developer. I developed Web and Mobile architecture, worked in cooperation with clients, business and QA team to achieve the best result.

### **Frontend Engineer, EvoPlay**

February 2018 – July 2018

As a Frontend Engineer skilled in React, Redux, Redux-saga, TypeScript, and GraphQL, my responsibilities included designing and developing intuitive user interfaces that deliver exceptional user experiences. I collaborate with cross-functional teams to translate design concepts into functional code, ensuring seamless integration with backend services through GraphQL.

### **Frontend Developer, Phase One Karma**

November 2017 – January 2018

As a Frontend Engineer proficient in Twig, HTML, SCSS, React, Redux, and TypeScript, my responsibilities included designing and developing engaging user interfaces that seamlessly integrate with backend systems. I ensured efficient data rendering and dynamic content presentation. Through the use of React, Redux, and TypeScript, I created modular, maintainable, and performant frontend components while actively participating in code reviews, optimizing user experiences, and staying current with emerging frontend technologies.

### **Frontend Engineer, Netvertise Ltd.**

February 2016 – October 2017

In this role my responsibilities included crafting engaging user experiences through proficient HTML/XML, CSS (SCSS), and JavaScript coding. Leveraging my skills in Magento, I collaborated on developing visually appealing and functional e-commerce platforms. Additionally, I specialized in ReactJS and Redux, building dynamic and responsive web interfaces, while also integrating PHP to ensure seamless communication between the frontend and backend systems.

### **Frontend Engineer, LITSLINK page**

August 2015 – February 2016

As a Frontend Engineer with expertise in HTML and JavaScript coding, along with proficiency in React.js and Ember.js, my responsibilities included designing and developing visually engaging and responsive user interfaces. I leveraged HTML and JavaScript to create interactive web components.

### **Frontend Developer, Anotheria.net**

2015 – August 2015

As a Frontend Engineer, my responsibilities were designing and developing user interfaces using HTML, CSS, and JavaScript, ensuring seamless and visually appealing web experiences. I contributed my skills as a Manual QA Tester, meticulously testing web applications to identify issues, validate functionality, and provide valuable feedback to the development team, ensuring a smooth and reliable user experience.

## **Coach, Cbsystematics Development**

November 2014 - July 2015

As a Frontend Engineer, my responsibilities were a range of tasks centered around the core technologies of HTML, CSS, and JavaScript. I specialized in conveying the foundational concepts of these languages through engaging presentations, facilitating private lessons to foster skill development, and crafting informative articles that delve into various aspects of front-end development.

## **EDUCATION**

### **Bachelor in Software Development, KPI named after Igor Sikorsky**

2017 - 2019

Through a balanced blend of theoretical knowledge and hands-on projects, I gained expertise in software design, coding, testing, and maintenance. The program emphasized real-world application, collaboration, and problem-solving, preparing me to create innovative and reliable software solutions that meet the evolving demands of the industry.

### **Front-End Web Development, CyberBionic**

2014

The Front-End Web Development program provided comprehensive training in crafting captivating and intuitive websites. I gained expertise in transforming design concepts into dynamic web interfaces using HTML, CSS, and JavaScript.
